

# Tokyo Data Center

## THE INGENUITY CLOUD SERVICES GUARANTEE

### Low Latency

Our global data footprint cuts latency and boosts speed to deliver your data faster.

### 99.995% Uptime

We surpass our Service Level Agreement, or you get your money back guaranteed.

### Secure

Services are proactively monitored for security threats and meet your compliance restrictions.

### Performance

World-class designed infrastructure, network, and hardware for highest performance available.

## TYO1 - TOKYO DATA CENTRE

Our newest Tier-3 data center, located in Koto City, is the ideal environment to serve your enterprise's mission critical workloads.

The 5MVA carrier neutral facility, staffed 24/7, houses an innovative cooling technology featuring 2N UPS resiliency in N+1 configuration to ensure superior uptime performance – ideal for fast-growing businesses looking for current generation hardware to power a wide range of applications in a well-connected site.

Our network is designed from the ground up with performance and reliability in mind. The site offers enterprise-grade connectivity for any workload, utilizing peering and multiple Tier-1 transit providers. With multiple uplinks providing diverse and resilient paths, we can offer high-capacity ports to ensure lightning-fast, uncontended connectivity to reach any audience. With 20 years of experience, we can service any requirement, no matter how custom or challenging the workload. Easily provision and manage your servers without impacting functionality during scaling operations. Plus, you can take advantage of our 95th percentile billing option to manage greater bandwidth for shorter periods of time and benefit from cost-effective and predictable hosting bills as you scale your business. Explore the latest generation of servers with total control over your infrastructure. [Speak to us about your hosting requirements and configure your ideal server today.](#)
